

AnnotAI Viewer

AnnotAI Viewer is a multilingual, browser-based viewer, annotator, presenter, and launcher for documents, media, URLs, AI tools, and social platforms.

It helps users open and review different types of content, draw directly on top of documents or media, present ideas visually, and quickly access popular English and Chinese AI tools and social media platforms from one convenient floating panel.

AnnotAI Viewer is designed as a lightweight web app that can run directly in the browser, making it suitable for teaching, research, meetings, content review, online collaboration, self-study, document presentation, media analysis, and AI-assisted workflows.

Overview

AnnotAI Viewer combines several useful functions into one browser-based workspace: Document viewer, Media viewer, PDF annotator, Presentation assistant, Multilingual interface URL loader, AI tool launcher, Social platform launcher, Floating, draggable, resizable toolbar, Annotation export and reload support. Instead of switching between multiple apps, users can open files, paste URLs, annotate content, use a laser pointer, zoom in and out, save annotations, and launch AI or social platforms from the same interface.

Key Features

Multilingual User Interface

AnnotAI Viewer includes a multilingual interface designed for international users. Users can change the interface language from the Settings menu. The selected language is saved locally, so the app can remember the preferred language across sessions. The app supports common global languages including: English, Chinese, Arabic, Bengali,

French, German, Hindi, Indonesian, Italian, Japanese, Korean, Portuguese, Russian, Spanish, Turkish, Urdu, Vietnamese.

Browser-Based Viewer

AnnotAI Viewer runs in a web browser. No traditional desktop installation is required. Users can open many common file types directly in the app including:

- Images: PNG, JPG, JPEG, GIF, WEBP, SVG
- Videos: MP4, WEBM, OGG, MOV, depending on browser support
- Documents: PDF, DOCX, TXT, RTF, CSV
- Spreadsheets: XLS, XLSX, CSV
- Archives and eBooks: ZIP, EPUB

Some formats, such as DOC, PPT, PPTX, RAR, and MOBI, can be detected but may require conversion or additional processing for full preview support.

PDF Viewing and Annotation

AnnotAI Viewer uses PDF rendering technology to display PDF pages inside the browser. Users can:

- Open PDF files
- Scroll through pages
- Annotate individual pages
- Use pen and highlighter tools
- Erase annotations
- Use laser pointer mode during presentation
- Save annotations as JSON
- Reload saved annotations later
- Export annotated views as PNG where supported

This makes the app especially useful for reviewing reports, lecture notes, academic papers, contracts, manuals, slides exported as PDF, and teaching materials.

Document and Spreadsheet Preview

AnnotAI Viewer supports document and spreadsheet preview using browser-side libraries. DOCX files can be converted to readable HTML for browser display. Spreadsheet files can be shown as HTML tables. Supported document workflow examples include:

- Reviewing DOCX reports
- Reading text files
- Opening CSV data
- Viewing XLS/XLSX spreadsheets
- Checking ZIP archive contents
- Previewing simplified EPUB eBook content

This allows users to quickly inspect files and annotate them without opening separate office software.

URL Loading

Users can paste a URL into the app and attempt to load it inside the viewer. Supported URL use cases include:

- Direct image
- URLs Direct video URLs
- Direct PDF URLs
- Text file URLs
- Online office document URLs
- General webpages, where iframe embedding is allowed

If a website blocks embedded viewing because of browser security policies, users can open it externally in a new tab using the **Open External** button. This is useful for online teaching, web research,

content review, and comparing online sources while keeping annotation tools nearby.

Annotation Tools

AnnotAI Viewer includes simple and practical annotation tools for visual communication.

OFF / Interact Mode

This mode allows users to interact with the content normally. Use this mode to:

- Scroll documents
- Use video controls
- Click embedded pages
- Move around zoomed documents
- Interact with iframe content
- Navigate the workspace

Pen Tool

The Pen tool is used for freehand drawing which is good for:

- Marking key points
- Writing quick notes
- Drawing arrows
- Circling important areas
- Explaining ideas visually

Highlighter Tool

The Highlighter tool creates semi-transparent strokes which is good for:

- Highlighting text
- Emphasizing spreadsheet cells

- Marking important document areas
- Teaching and reviewing content

Eraser Tool

The Eraser removes annotation strokes which is good for:

- Correcting mistakes
- Cleaning up a page
- Removing old markings
- Updating explanations during presentation

Laser Pointer

The Laser tool works as a temporary pointer for presentation which is good for:

- Teaching live classes
- Presenting documents
- Pointing at chart areas
- Guiding audience attention
- Reviewing media frames

Laser marks are temporary and are not saved as permanent annotations.

Floating Annotation AI Tools Panel

AnnotAI Viewer includes a floating toolbar panel named **Annotation AI Tools**. The panel can be:

- Opened from a floating dot
- Collapsed when not needed
- Dragged around the screen
- Resized horizontally
- Resized vertically
- Widened or narrowed
- Made taller or shorter

- Scrolled to reveal all tools
- Remembered across sessions using local storage

This flexible panel design helps users keep the workspace clean while still having quick access to all features.

AI Tool Launchers

AnnotAI Viewer includes dropdown launchers for popular AI tools. The app provides separate launchers for: AI Tools EN, AI Tools CN.

Examples of English/global AI tools include:

- ChatGPT
- Claude
- Gemini
- Microsoft Copilot
- Perplexity
- NotebookLM
- Grok Poe
- Mistral Le Chat
- Meta AI

Examples of Chinese AI tools include:

- DeepSeek
- Kimi
- Qwen / Tongyi Qianwen
- ERNIE Bot / Wenxin Yiyan
- Doubao
- Zhipu Qingyan
- iFlytek Spark
- Tencent Yuanbao
- Hailuo AI

- StepFun Yuewen

These launchers help users quickly access AI assistants for:

- Summarizing documents
- Translating content
- Asking questions
- Writing explanations
- Coding
- Research
- Creating lesson plans
- Generating discussion points
- Comparing ideas
- Improving productivity

The selected tool opens in a new browser tab, preserving the current AnnotAI Viewer workspace.

Social Media and Media Platform Launchers

AnnotAI Viewer also includes dropdown launchers for English and Chinese social media platforms. The app provides: Media EN, Media CN.

Examples of English/global platforms include:

- YouTube
- Facebook
- Instagram
- TikTok
- X / Twitter
- LinkedIn
- Reddit
- Snapchat

- Pinterest
- WhatsApp

Examples of Chinese platforms include:

- WeChat
- Douyin
- Xiaohongshu / RedNote
- Weibo
- Bilibili
- Kuaishou
- QQ
- Zhihu
- Baidu
- Tieba
- Toutiao

These launchers are useful for:

- Content research
- Social media review
- Teaching with online examples
- Media comparison
- Marketing research
- Creator workflows
- Cross-platform content planning

Zoom and Fit Controls

AnnotAI Viewer includes zoom controls to support detailed review.

Users can:

- Zoom in
- Zoom out
- Reset zoom

- Fit content to width
- This is useful for:
- Reading small text
- Inspecting images
- Reviewing charts
- Presenting on different screen sizes
- Using the app on tablets or mobile devices

Save, Load, and Export

AnnotAI Viewer supports annotation persistence and export. Users can:

- Save annotations as JSON
- Load annotation JSON later
- Export the current annotated view as PNG where possible

This helps users continue review work later, share annotated screenshots, or keep teaching and meeting records. Please note that browser security may prevent exporting some cross-origin embedded content.

Who Can Benefit from AnnotAI Viewer?

AnnotAI Viewer is designed for a wide range of users.

Teachers and Educators

Teachers can use AnnotAI Viewer to present and annotate learning materials during lessons which is useful for:

- Marking PDFs during class
- Highlighting textbook pages
- Drawing explanations on images
- Using laser pointer mode during teaching
- Opening online learning resources
- Launching AI tools for lesson support

- Teaching multilingual students

Example use cases:

- Annotating a worksheet live
- Explaining a diagram
- Highlighting grammar or vocabulary
- Reviewing student submissions
- Presenting lecture notes
- Opening YouTube or Bilibili educational videos

Students and Learners

Students can use AnnotAI Viewer for self-study and note-taking which is useful for:

- Reading PDFs
- Highlighting key points
- Annotating lecture slides
- Reviewing documents
- Opening eBooks
- Using AI tools for explanations
- Comparing multilingual content

Example use cases:

- Highlighting exam notes
- Annotating research papers
- Studying EPUB textbooks
- Asking AI to explain difficult concepts
- Reviewing class materials in another language

Researchers and Academics

Researchers can use AnnotAI Viewer to review papers, datasets, and references which is useful for:

- Reading academic PDFs
- Marking important sections
- Reviewing data tables
- Opening research URLs
- Using AI for summarization
- Launching search and AI tools quickly
- Comparing sources across languages

Example use cases:

- Annotating journal articles
- Highlighting citations
- Reviewing experimental data
- Summarizing papers with AI
- Opening related references
- Preparing research presentations

Business Professionals

Business users can use AnnotAI Viewer for document review, presentation, and meetings which is useful for:

- Reviewing reports
- Annotating proposals
- Presenting spreadsheets
- Marking charts
- Reviewing contracts
- Opening business URLs
- Using AI tools for summaries and writing

Example use cases:

- Marking sales reports
- Presenting financial charts
- Reviewing project documents
- Annotating meeting materials
- Summarizing long documents with AI
- Preparing client presentations

Designers and Creative Teams

Designers and creative teams can use AnnotAI Viewer for visual review which is useful for:

- Reviewing images
- Drawing feedback on screenshots
- Annotating design drafts
- Presenting visual concepts
- Reviewing media files
- Sharing marked-up PNG exports

Example use cases:

- Marking design changes
- Reviewing UI screenshots
- Highlighting layout issues
- Giving visual feedback to teammates
- Presenting visual ideas during meetings

Content Creators and Social Media Managers

Content creators can benefit from the media and social platform launchers which is useful for:

- Reviewing media files
- Comparing social platforms

- Opening YouTube, TikTok, Bilibili, Douyin, Xiaohongshu and more
- Planning multilingual content
- Annotating screenshots or video frames
- Using AI tools for captions, scripts, and summaries

Example use cases:

- Reviewing a video draft
- Marking thumbnail ideas
- Comparing platform content
- Planning posts for English and Chinese audiences
- Using AI to generate descriptions or scripts

Translators and Multilingual Teams

The multilingual interface makes AnnotAI Viewer useful for translation and international collaboration which is useful for:

- Reviewing multilingual documents
- Switching interface languages
- Annotating translated content
- Comparing English and Chinese resources
- Using AI translation tools
- Supporting international users

Example use cases:

- Reviewing bilingual PDFs
- Marking translation issues
- Explaining document changes to global teams
- Launching AI tools for translation support

Trainers, Coaches, and Presenters

Trainers and presenters can use AnnotAI Viewer as a visual presentation companion which is useful for:

- Presenting documents
- Using laser pointer mode
- Highlighting important points
- Annotating slides exported as PDF
- Opening online resources
- Keeping tools in a movable floating panel

Example use cases:

- Training sessions
- Online workshops
- Product demonstrations
- Coaching calls
- Technical walkthroughs
- Conference presentations

Developers and Technical Reviewers

Developers can use AnnotAI Viewer to review technical documents, screenshots, and files is useful for:

- Annotating UI screenshots
- Reviewing documentation
- Opening JSON, CSV, TXT, or code-like files
- Launching AI coding assistants
- Reviewing architecture diagrams
- Marking bugs visually

Example use cases:

- Reviewing API documentation
- Marking UI bugs

- Annotating logs or CSV files
- Explaining code flow using screenshots
- Opening AI tools for debugging support

Typical Use Cases

- Classroom Teaching: A teacher opens a PDF worksheet, uses the highlighter to mark key points, switches to laser pointer mode during explanation, then opens an AI tool to generate extra practice questions.
- Academic Research: A researcher opens a journal PDF, highlights important paragraphs, saves the annotations as JSON, and launches an AI assistant to summarize selected ideas.
- Business Meeting: A manager opens a spreadsheet report, circles unusual numbers with the Pen tool, uses Fit Width for presentation, then exports an annotated PNG for meeting notes.
- Content Review: A creator opens a video file, pauses on a frame, uses annotations to mark changes, and opens YouTube or TikTok for platform comparison.
- Multilingual Collaboration: A team switches the interface language, opens a bilingual document, uses annotations to discuss wording, and launches Chinese or English AI tools for rewriting suggestions.

Interface Guide:

Floating Dot

When the app starts, the toolbar may appear as a small floating dot. Click or tap the dot to expand the tool panel.

Annotation AI Tools Panel

The expanded panel contains all main tools:

- Open File
- URL input
- Load URL
- Open External
- Settings
- Help
- Language selector
- AI launchers
- Media launchers
- Annotation modes
- Color selector
- Stroke size slider
- Zoom controls
- Undo / Redo
- Clear annotations
- Save / Load JSON
- Export PNG

Panel Resizing

The panel can be adjusted in several ways:

- Drag the panel header to move it
- Use the resize handle to resize it
- Use Wider / Narrower buttons
- Use Taller / Shorter buttons
- Scroll inside the panel if tools are hidden

Keyboard Shortcuts

AnnotAI Viewer includes several shortcuts for faster use.

Shortcut: Action

- O: OFF / Interact mode
- P: Pen tool
- H: Highlighter tool
- E: Eraser tool
- L: Laser pointer
- Ctrl / Cmd + Z: Undo
- Ctrl / Cmd + Y: Redo
- Ctrl / Cmd + +: Zoom in
- Ctrl / Cmd + -: Zoom out
- Ctrl / Cmd + 0: Reset zoom

Browser and Platform Notes

AnnotAI Viewer is designed to work in modern browsers.

Recommended browsers:

- Google Chrome
- Microsoft Edge
- Mozilla Firefox
- Safari, with some feature differences
- Mobile browsers, depending on file and media support

Because the app is browser-based, some features depend on browser security rules and device capabilities.

Important Limitations

AnnotAI Viewer is powerful, but browser-based apps have natural limitations.

Local File Access

The app can only access local files selected by the user. It cannot freely browse your file system.

If the page is refreshed, local file object URLs may be lost, and the file may need to be opened again.

Website Embedding

Some websites block iframe embedding for security reasons.

If a webpage does not load inside the viewer, use Open External.

Cross-Origin Content

Some cross-origin images, videos, or embedded pages may not be exportable to PNG because of browser security restrictions.

Office and Special Formats

DOCX and spreadsheets are supported through browser-side conversion. However, complex formatting may not be perfectly preserved.

Formats like DOC, PPT, PPTX, RAR, and MOBI may require conversion or additional libraries for reliable preview.

Privacy and Security

AnnotAI Viewer is designed to work mostly inside the browser.

Local files are opened by user selection. The app does not automatically upload local files unless additional server-side features are added by the host or developer.

AI tools and social platforms opened from the launchers run in separate tabs and are governed by their own privacy policies, accounts, and terms of service.

Users should avoid uploading sensitive documents to external AI or social platforms unless they understand the privacy implications.

Installation and Deployment

AnnotAI Viewer can be used as a standalone HTML web app.
It can also be hosted on static hosting services such as:

- GitHub Pages
- Gitee Pages
- Netlify
- Vercel
- Cloudflare
- Pages
- Firebase Hosting
- AWS S3 static hosting

The app can also be configured as a Progressive Web App with:

- manifest.json
- sw.js
- App icons
- Offline caching

When installed as a PWA, users can launch it like a regular app from supported browsers and devices.

Repository Structure

Example Manifest Information

```
{ "name": "AnnotAI Viewer",  
  "short_name": "AnnotAI",  
  "description": "A multilingual browser-based viewer, annotator,  
presenter and launcher for documents, media, URLs, AI tools and  
social platforms.",  
  "start_url": "./index.html",  
  "display": "standalone",  
  "background_color": "#111827",  
  "theme_color": "#2563eb"  
}
```

Why Use AnnotAI Viewer?

AnnotAI Viewer is useful because it brings together tools that are usually spread across different apps:

- File viewing
- PDF reading
- Image and video review
- Annotation
- Presentation
- AI launcher
- Social media launcher
- Multilingual interface
- URL loading
- Export and save tools

It is especially helpful when users need to explain, review, teach, compare, annotate, and research content quickly.

Project Summary

AnnotAI Viewer is a flexible, multilingual, browser-based productivity tool for viewing, annotating, presenting, and launching AI and social platforms.

It is useful for teachers, students, researchers, business users, designers, creators, translators, developers, trainers, and anyone who works with documents, media, online resources, or AI tools.

With its movable and resizable floating panel, practical annotation tools, multilingual interface, and quick access to English and Chinese AI/social platforms, AnnotAI Viewer provides a convenient all-in-one workspace for modern digital learning, reviewing, presenting, and content exploration.
